

Case Study ~ Job# 64005, 64027, 64032

## Power & Data Installation

**CLIENT: Department of Defence**

- AAFCANS
  - o Victoria Barracks
  - o Laverton
  - o DSTO Fishermans Bend

**WORKS: Installation and upgrades to power and data networks at various defence facilities.**

**Date: January 2014**

### Scope of Works

- Design, installation and commissioning of power and data requirements.
- Upgrade of switchboards and Residual Current Devices as required.
- Ensure installation met required safety standards.
- Testing and certification of all works as required.
- Audit works to ensure coverage was obtained as required.
- Design and install signage to correspond with new circuitry upgrades.

### The Challenges

- To provide services in active Defence base with restricted shut down opportunities
- Complete works in restricted work locations.
- Provide solutions where installation was likely to be effected by presence of asbestos
